

Qualitätszertifikat/Certificate of Conformity

Eppendorf UVette® US Patent 6249345

We hereby certify that the Eppendorf UVette®

Cat No: 0030 106.300

has been produced according to the valid production procedures and was tested in accordance to the valid test procedures. It fulfills the eppendorf specifications:

- ❖ **Dimensions:** Width: 12.5 mm
Depth: 12.5 mm
Height: 36 mm
- ❖ **Wavelength range:** 220 to 1,600 nm
- ❖ **Cuvette blank:** $\leq 0.5 A^*$ at 260 nm
(absorbance of the water-filled cuvette against air)
- ❖ **Variance of cuvette blank:** $s \leq 15 mA^*$ at 260 nm
- ❖ **Filling volume:** 50 to 2,000 μl
- ❖ **Chemical resistance:** Resistant to the reagents normally used in the field of molecular biology (e.g. ethanol, acidic and alkaline buffers, phenol saturated with water).

Not resistant to non-polar solvents such as chloroform, diethyl ether and toluene.

The production of the Eppendorf UVette® is done under fully controlled environment and conditions. Products from that production line are free from detectable DNA and RNase contamination when tested according to the concerning test procedures.
